Dacs is an ISO 9001 accredited company The Director's of Dacs are conscious of the need to: Develop a clear understanding of the architectural aspects of each project within the context of the brief. Produce project solutions which are economic, practical, socially responsible and compatible with the brief.

Achieve, sustain and improve the actual Quality of services provided in a manner that will continually meet the stated need of the Practice's Clients in a cost effective way. This will be achieved by way of frequent Quality audits and Quality Management meetings at Board level. Provide a documented assurance to Clients that the intended level of service will be, is being and has been achieved.

Establish and maintain a commitment to continual improvement in Quality Performance, Objectives and targets which comply to relevant Legislation and in house programmes in order to pursue quality of service.
